# Career Cluster Maps

The P2C Career Cluster Maps provide an overview of regional high-demand occupations associated with various job zones (i.e., levels of education and training). The purpose of these maps is to assist educators and students in developing awareness of entry and exit points within a particular career field. The maps have been developed to align with the National Career Clusters Framework and rely on the O\*NET job zone classification system to accurately assign occupations to job zones. Labor market data displayed in the cluster maps was collected from state and regional labor departments to reveal market demand and median wages for each occupation. In using these maps, educators and students can quickly gain a sense of potential high-value career opportunities and the level of education and training needed to prepare for these professions. This can promote the alignment of education practices with regional careers and assist students in making informed career decisions that take into account regional labor market demands.

Career Cluster Map Data		
Data Category	Data Description	Potential Application
Occupations by Job Zone	<ul style="list-style-type: none"> <li>Occupations listed by highest projected demand within each job zone</li> </ul>	<ul style="list-style-type: none"> <li><b>Understanding Entry and Exit Points</b> – Educators and students can identify employment opportunities that are highest in demand at various education levels. This can be used to encourage informed decisions about when to enter and exit education/training programs.</li> </ul>
Annual Openings	<ul style="list-style-type: none"> <li>Projected annual openings displayed for each occupation</li> </ul>	<ul style="list-style-type: none"> <li><b>Evaluating Employment Opportunity</b> – Occupations that are higher in in annual openings offer more opportunity for students. Educational practices can be directed toward preparing students for occupations that are highest in demand.</li> </ul>
Median Wage	<ul style="list-style-type: none"> <li>Median wage data listed for each occupation</li> </ul>	<ul style="list-style-type: none"> <li><b>Assessing Occupation Value</b> – Data related to median wages can be used to determine which occupations offer the most value to students. Career readiness efforts can target high-value occupations with higher wages, as well as higher annual openings.</li> </ul>

\* Few occupations in these pathways require education at this level.

\*\*\* = Insufficient Data
